understandings that were present in the world where those scribes lived. Questions relating to the provenance, compilation, script, function, and use - both medieval and modern - of manuscripts are raised and are resolved in a fresh manner. A number of different literary genres and types are explored, ranging from devotional materials (e.g. psalters, sermons, and illustrated gospel books) to texts of a more worldly orientation. A number of plates illustrate the work of particular scribes. While some beautiful codices are showcased, the emphasis falls on plain books written in English, including the Vercelli Book, the Exeter Book, and the Blickling Homilies. Analyses of the history of palaeography and the theory of editing raise the point that whatever we know from old books is conditioned by the
