This is the first world history of empire, reaching from the third millennium BCE to the present. By combining synthetic surveys, thematic comparative essays, and numerous chapters on specific empires, its two volumes provide unparalleled coverage of imperialism throughout history and across continents, from Asia to Europe and from Africa to the Americas. Only a few decades ago empire was believed to be a thing of the past; now it is clear that it has been and remains one of the most enduring forms of political organization and power. We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods, such as the relatively short age of European colonialism. The history of empire, as these volumes amply demonstrate, needs to be drawn on the much broader canvas of global history. Volume Two: The History of Empires tracks the protean history of political domination from the very beginnings of state formation in the Bronze Age up to the present. Case studies deal with the full range of the historical experience of empire, from the realms of the Achaemenids and Asoka to the empires of Mali and Songhay, and from ancient Rome and China to the Mughals, American settler colonialism, and the Soviet Union. Forty-five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases.

Sir Martin Ewans, former Head of the British Chancery in Kabul, puts into an historical and contemporary context the series of tragic events that have impinged on Afghanistan in the past fifty years. The book examines the roots of these developments in Afghanistan's earlier history and external

relationships, as well as their contemporary relevance, internally, regionally, and globally. The book also reviews in details the emergence of the Taliban, their ideology and their place within Islam, and examines Afghanistan's relevance in global issues, notably the nature of Islamic extremism, the international drugs trade and international terrorism. It ends with an analysis of the country post-Taliban.

This volume critically reassesses the history and impact of international law in Italy. It examines how Italy's engagement with international law has been influenced and cross-fertilized by global dynamics, in terms of theories, methodologies, or professional networks. It asks to what extent historical and political turning points influenced this engagement, especially where scholars were part of broader academic and public debates or even active participants in the role of legal advisers or politicians. It explores how international law was used or misused by relevant actors in such contexts. Bringing together scholars specialized in international law and legal history, this volume first provides a historical examination of the theoretical legal analysis produced in the Italian context, exploring its main features, and dissident voices. The second section assesses the impact on international law studies of key historical and political events involving Italy, both international and domestically; and, conversely, how such events influenced perceptions of international law. Finally, a concluding section places the preceding analysis within a broader, contemporary perspective. This volume weighs in on in the growing debate on the need to explore international law from comparative and local viewpoints. It shows how regional, national, and local contexts have contributed to shaping international legal rules, institutions, and doctrines; and how these in turn influenced local solutions.

Chronicles American foreign relations literature from colonial times to the present, with updated material on post World-War II.
