When *Agendas and Instability in American Politics* appeared fifteen years ago, offering a profoundly original account of how policy issues rise and fall on the national agenda, the *Journal of Politics* predicted that it would “ become a landmark study of public policy making and American politics. ” That prediction proved true and, in this long-awaited second edition, Bryan Jones and Frank Baumgartner refine their influential argument and expand it to illuminate the workings of democracies beyond the United States. The authors retain all the substance of their contention that short-term, single-issue analyses cast public policy too narrowly as the result of cozy and dependable arrangements among politicians, interest groups, and the media. Jones and Baumgartner provide a different interpretation by taking the long view of several issues—including nuclear energy, urban affairs, smoking, and auto safety—to demonstrate that bursts of rapid, unpredictable policy change punctuate the patterns of stability more frequently associated with government. Featuring a new introduction and two additional chapters, this updated edition ensures that their findings will remain a touchstone of policy studies for many years to come.

What would happen if believers truly grasped how the resurrection of Jesus changes not just their own standing with God, but that it changes everything? In the spirit of John Piper's *Fifty Reasons Why Christ Came to Die*, Steven D. Mathewson unpacks the New Testament Scriptures that speak of the reasons Jesus was raised from the dead. In fifty brief chapters, he offers readers faith-filled meditations on the primary passages on the resurrection, taking these ancient truths and applying them to contemporary life. With compelling insight, he shows why Jesus not only had to die, but why his resurrection was necessary and how our lives change when we understand and embrace this essential truth of the Christian faith.
