**Qualified** directions, this book lays the foundation for how to structure teaching environments, as well as offers countless examples of activities for students, ranging from basic skills, to reading and math, to social behavior.

This title recognizes the importance of offering stabilization strategies that afford students a better regulated body, often enabling students with classic autism to increase their time in school, most of them working up to full-day participation.

Data collection is one of the critical elements of an effective, efficient, and accountable program that supports student development and learning. However, many intervention teams struggle to develop reasonable and sustainable

Qualified methods of gathering information about student performance and progress. Now comes **SHOW ME THE DATA!** This must-have resource consists of a brief discussion on data collection accompanied by a CD containing a comprehensive compilation of data sheets to help make that once-dreaded task easier and simpler. The data sheets are of two types: generic forms appropriate for students of any age and/or ability and forms focusing on specific skills appropriate mostly for young children or children with significant cognitive delays. Forms may be customized for particular programs and individual students. Finally, to help teams figure out what to do with the data once they have been collected, samples of completed data sheets and easy-to-use graphs are included as a model for how teams can display their data visually and evaluate the effectiveness of intervention
