Measure by the  
or applied theory and  
cases.

Cutting-Sewing-  
Finishing is the  
common terminology  
used for the overall  
process that takes  
place in any  
organisation  
manufacturing  
garments via the  
industrial way. The  
cutting room or

# Download Free Made To

cutting department is the place where all the pre-sewing activities like spreading, cutting, bundling, ticketing, fusing, and embroidery are conducted before the cut components are sent to the sewing department. In a garment factory, cutting department is

# Download Free Made To

pivotal from the  
point of view of  
controlling the  
material utilisation,  
considering the fact  
that material  
constitutes 60% of  
the manufacturing  
cost. Although the  
labour cost  
component in  
spreading and  
cutting is very less in  
comparison to

# Download Free Made To

Sewing, the process involves material conversion which is irreversible, and hence, it is profoundly significant. Like any other department, the technology used and the processes being followed are the two most important parameters of cutting

Download Free

Made To

Measure Ultra

room. This multi-author book is an honest attempt on our part to cover all the cutting room processes in detail to unravel the relevance of material utilisation for garment manufacturing and thus provide an essential guide for cutting room managers and

# Download Free Made To

executives. These processes act as the tipping point for a garment factory where even a minor wastage or saving done in the fabric being used can have a major impact on the order margins. Besides, they lay the foundation for the garments ' quality and hence become all

# Download Free Made To the more important.

This publication is concerned with gerontechnology - the study of technology and ageing with the aim of improving the functioning of older people in daily life. The first part of the
