It was the revelation of the millennium: witches, werewolves, vampires and other supernaturals are real. Fast-forward 13 years: TV reporter Delilah Street used to cover the small-town bogeyman beat back in Kansas, but now, in high-octane Las Vegas—which is run by a werewolf mob—she finds herself holding back the gates of Hell itself. But at least she has a hot new guy and one big bad wolfhound to help her out...

A unique, comprehensive reference that integrates the molecular, cellular, physiological, pathological, and engineering aspects of regenerative processes Bioregenerative engineering is an emerging discipline based on applying engineering principles and technologies to regenerative medicine. It induces, modulates, enhances, and/or controls regenerative processes by using engineering approaches to improve the restoration of the structure and function of disordered or lost molecules, cells, tissues, and organs. This reference systematically summarizes bioregenerative engineering principles, technologies, and current research to help scientists understand biological regeneration and design new therapeutic strategies. Succinct and well-organized with a detailed table of contents to help readers pinpoint information, this reference: * Provides the fundamental theory and principles of molecular, cellular, and tissue regenerative engineering concurrently with experimental approaches * Presents the foundations of bioregenerative engineering, encompassing the molecular basis, the regulatory mechanism of regeneration, and the developmental aspects * Combines molecular and cell biology with potential applications * Addresses experimental design, methods, and modeling at the molecular/cellular/tissue levels * Covers the general mechanisms and technologies of bioregenerative engineering, as well as its application to the treatment of human disorders * Discusses the engineering tests and therapies for major organ systems Presenting an in-depth introduction to the biological and engineering aspects of the field and an up-to-date overview of current research, this is a one-of-a-kind resource for scientific researchers and medical practitioners, as well as for graduate and undergraduate students in biomedical engineering, bioengineering, chemical engineering, molecular biology, and cell biology.

The Lady of the Mists has seen a vision: Three women, all born when the moon was concealed by the shadow of the sun, would hold the future of the world in their hands, determining whether it would be lost or saved. Three children of a red moon, a blood moon ... One a wizard, one Phaerie Born, and the other ...! Try as she would to see this woman - and she knew in her heart it was a woman - all that would come into her mind was the image of a grey horse, running, running ... Following the passing of Valir, Croisand has become the Windeye, the Shaman of the Xandim. Once shapeshifters, the Xandim were able to pass from human to equine form, until they were cursed by Hellorin, the Forest Lord of Phaerie, locked into horse form and mind, to act as steeds for his people, coursing across the night skies as they hunt down humans. But now Corisand has been gifted with Valir's unique knowledge, she alone knows that her race could be so much more. And she alone holds the key to stopping an act of epic folly from overturning the worlds of Phaerie, Magefolk and mortal alike.
