Treadmill Manuals It's important to build your treadmill in the box. The base of the treadmill frame is spring loaded, with a hydraulic cylinder connecting the running deck to the base of the treadmill. If the machine is lifted off the ground without a locking pin inserted, the hydraulic frame can extend out and cause injury.

A manual treadmill (one without a motor) doesn't need much clearance space ahead of it. But if you're using an electrical treadmill, allow for around 50cm of space so the motor is properly ventilated. In terms of how much space you should have either side of the equipment, we recommend double the width of your treadmill.
