In today's competitive business environment, most companies realize that the better they can manage their customer relationships, the more successful they will become. Customer Relationship Management (CRM) software systems are key tools for companies to manage the customer-facing processes of their businesses. However, many companies have resisted implementing this most critical customer-oriented application due in large part to the lack of a single-point resource on implementing a CRM system. This book attempts to fill that gap. Implementing SAP® CRM will help technologists and managers come to grips with the vision, concept, and technology of CRM. It begins by laying out the groundwork for understanding CRM. It explains the concept and context of CRM and the tangible business benefits of CRM adoption. Demonstrating a professional approach to the evaluation and selection of SAP, it details the critical success factors (CSFs), patterns, and anti-patterns of a successful SAP CRM implementation.

Read Book Sap Cfm Configuration Documents

CRM implementations can add significant benefit to the company's bottom line only if the company first transforms itself into a customer-centric and customer-responsive enterprise. This book explains what it means to be a customer-centric and responsive enterprise, and provides a framework for business operations based on customer relationships, rather than the traditional four Ps (product, positioning, price, promotion). It further spells out business process reengineering (BPR) strategies to configure internal business processes and operations with SAP CRM to improve customer-facing strategies, services, and relationships.

The goal of this text is to describe the technical design aspects of the IT infrastructure; it does not give the details of installing and customizing SAP software, nor business process reengineering. Using primarily HP products for the solution examples, the chapters guide the reader through the foundation of the systems from an IT perspective, reviews its business application and architecture and introduces the server systems, then describes data storage, high availability and recovery solutions, client PCs with front-end user interfaces, output management and printing solutions, network infrastructure and requirements, cabling designs, LANs and WANs, and connecting mySAP.com to the Internet. Both authors are members of the HP-SAP International Competence Center. Annotation copyrighted by Book News, Inc., Portland, OR

* Implement and use Variant Configuration with SAP * Build and maintain a complete product model * Updated coverage on SAP ERP 6.0 enhancement pack 5 and CRM 7.0 With this all-inclusive reference,

Do you want to utilize the new CRM user interface in the best possible way? This comprehensive guide,

Read Book Sap Cfm Configuration Documents

suitable for SAP CRM 2007 and SAP CRM 7.0, explains everything that you need to know about the CRM Web Client: the architecture of the UI framework, the Customizing options (roles, navigation, portal integration, and much more), as well as all options that are available for customer-specific extensions through programming. Readers quickly discover the critical modeling tools, such as the Easy Enhancement Workbench (EEWB) and the UI Configuration Tool. Then, explore all options for adapting the header, navigation, and work area without any development effort. The authors provide an in-depth look at the individual components of views, windows, and controllers, and deliver priceless tips on context binding, model integration, navigation and more. You'll learn about development and extension of UI components, the usage of the Business Object Layer (BOL), and the extension of the GenIL object model, as well as the modeling and usage of web services for the integration of Office applications. What's more, you'll also find comprehensive real-life examples to provide you with additional support for your daily project tasks.

This book - compiled by software architects from SAP - is a must for consultants, developers, IT managers, and students working with SAP ERP, but also users who want to know the world behind their SAP user interface.
