Researchers have laid out a set of proposals outlining how consumers could satisfy their needs for clothes and textiles with significantly reduced impact on the environment, while also offering new business opportunities to UK companies. This book looks at these proposals.

Conceived in the immediate aftermath of the humiliations and killings of prisoners in Afghanistan and Iraq, of the suicides and hunger strikes at Guantanamo Bay and of the disappearances of detainees through extraordinary rendition, this book explores the connections between these shameful events and the inhumanity and degradation of domestic prisons within the 'allied' states, including the USA, Canada, Australia, the UK and Ireland. The central theme is that the revelations of extreme brutality perpetrated by allied soldiers represent the inevitable end-product of domestic incarceration predicated on the use of extreme violence including lethal force. Exposing as fiction the claim to the political moral high ground made by western liberal democracies is critical because such claims animate and legitimate global actions such as the 'war on terror' and the indefinite detention of tens of thousands of people by the United States which accompanies it. The myth of moral virtue works to hide, silence, minimize and deny the brutal continuing history of violence and incarceration both within western countries and undertaken on behalf of western states beyond their national borders.

Low-lying countries, such as the Netherlands, are strongly dependent on good and safe sea defences. In the past, the design of dikes and revetments was mostly based on vague experience, rather than on general valid calculation methods. The demand for reliable design methods for protective structures has, in the Netherlands, resulted in increased research in this field. These contributions have been prepared by Dutch experts participating in the study groups of the Technical Advisory Committee on Water Defences. The book opens with an outline of general strategy and methodology on sea defences, illustrated in the following chapters by technical information on specific items and Dutch experience, and it ends with more general aspects such as probabilistic approach, integral (multifunctional) design, management & safety assessment. Together, these chapters provide an almost complete technical overview of the items needed for the design and maintenance of dikes and revetments.

The enclosed CRESS-program allows for an initial estimation of hydraulic loads and preliminary design.

The Handbook of Bird biology covers all major topics, from anatomy and physiology to ecology, behavior, and conservation biology. One full chapter addresses vocal communication and is accompanied by a CD of bird vocalizations. Produced by the Cornell Laboratory of Ornithology's world-renowned Macaulay Library of Natural Sounds, the CD illustrates key elements of bioacoustics. The book's text was written by 12 leading ornithologists and illustrated by respected photographers and artist John Schmitt. It includes an extensive glossary and index, a list of the common and scientific names of all birds mentioned in the text, author profiles, suggested readings following each chapter, and a complete reference section. The Handbook serves as the backbone of the Lab's popular Home Study Course in Bird Biology, a self-paced course that can be taken from anywhere in the world, by anyone with a serious interest in birds who would like guidance from professional ornithologists.

Musica Poetica provides an unprecedented examination of the development of Baroque musical thought. The initial chapters, which serve as an introduction to the concept and teachings of musical-rhetorical figures, explore Martin Luther ' s theology of music, the development of the Baroque concept of musica poetica, the idea of the affections in German Baroque music, and that music ' s use of the principles and devices of rhetoric. Dietrich Bartel then turns to more detailed considerations of the musical-rhetorical figures that were developed in Baroque treatises and publications. After brief biographical sketches of the major theorists, Bartel examines those theorists ' interpretation and classification of the figures. The book concludes with a detailed presentation of the musical-rhetorical figures, in which each theorist ' s definitions are presented in the original language and in parallel English translations. Bartel ' s clear, detailed analysis of German Baroque musical-rhetorical figures, combined with his careful translations of interpretations of those figures from a wide range of sources, make this book an indispensable introduction and resource for all students of Baroque music.

Piers Vitebsky's study of religion and psychology in tribal India focuses upon a unique form of dialogue between the living and the dead which is conducted through the medium of a shaman in trance. The dead sometimes nurture their living descendants, yet at the same time they inflict upon them the very illnesses from which they themselves have died. Through intimate dialogue, the Sora use the occasion of death to explore their closest emotional attachments in all their ambivalence. Dr Vitebsky analyses the actors' words and relationships over several years and develops a typology of moods among the dead and kinds of memory among the living. In comparing Sora shamanism with the treatment of bereavement in psychoanalysis and psychotherapy, he highlights a contrast in their assumptions which has far-reaching consequences for the social and professional scope of the two kinds of practice.

Letters of Lydia Maria Child is an unchanged, high-quality reprint of the original edition of 1883. Hansebooks is editor of the

literature on different topic areas such as research and science, travel and expeditions, cooking and nutrition, medicine, and other genres. As a publisher we focus on the preservation of historical literature. Many works of historical writers and scientists are available today as antiques only. Hansebooks newly publishes these books and contributes to the preservation of literature which has become rare and historical knowledge for the future.
