Written by experienced, award-winning teachers of Global History from throughout New York State, Let's Review Regents: Global History and Geography 2020 has been fully updated to review the "Transition Exam" format, cover significant world events from 1750 to the present, and include practice questions as well as two actual, recently released, Global History and Geography "Transition Exams" with answer keys and online access to an overview of the "Global History and Geography II Exam." This book offers: Extensive review of all frequently tested topics from 1750 to the present Extra practice questions with answers for all tested topics A detailed overview of the "Transition Exam" and an introduction to the course A thorough glossary of all key terms from 1750 to the present Two actual, recently released, Global History and Geography "Transition Exams" with answer keys A webpage that contains an overview of the "Global History and Geography II Exam" and answers to frequently asked questions about that version of the exam This book is designed primarily to prepare high school students for the Global History and Geography Regents exams, but it will also be helpful to students in their daily Global History and Geography coursework. Looking for additional practice and review? Check out Barron's Regents Global History and Geography Power Pack 2020 two-volume set, which includes Regents Exams and Answers: Global History and Geography in addition to Let's Review Regents: Global History and Geography.

Meet the Rocket City Rednecks. They're five "backwoods" guys from the rocket city: Huntsville, Alabama, home to NASA's Marshall Space Flight Center and the birthplace of the U.S. space program. Sure, they love to shoot stuff and drink beer, and one of 'em lives in a trailer, but with a family tree full of NASA rocket scientists (not to mention their own PhDs and advanced degrees), they aim a little higher?4like using homemade moonshine to fuel a rocket! Now, in typical laidback style, Dr. Travis S. Taylor, leader of the crew, delivers the goods on how America can return to space exploration and manned space flight. What's needed is a good old "try anything" attitude, a bit of gumption, and the spectacularly entertaining backyard science that's the Rocket City Redneck specialty. At the publisher's request, this title is sold without DRM (Digital Rights Management).

Books in this series take the reader on field trips to the most unlikely of destinations! In this title, strap yourself in as we explore a space station far above Earth's surface. Our tour will include a look at daily life on board, how astronauts exercise, work and even go to the toilet.

Plan exciting activities and classroom units based on holidays, historic events, important birthdays, and more with this day-by-day calendar.
