Education Reform in the American States is a timely evaluation of the accountability movement in American public education, culminating in the No Child Left Behind Act, federal legislation of 2002. The authors treat the current accountability movement, placing it in historical context and addressing the evolution in public education policymaking from the overwhelming emphasis on state and local discretion to increasing federal oversight and mandates related to federal funding. They provide case studies of the educational accountability movements in nine states and analyze the factors and forces which explain progress in achievement levels as measured on standardized tests and the states' prospects for meeting their NCLB targets. The book and the individual case studies acknowledge the merits of NCLB while exposing several significant flaws and unintended harmful consequences of the act, particularly its incentives for states to lower their standards in order to meet annual yearly progress targets and its threat to withdraw federal funds from districts with the highest percentage of disadvantaged students. The audience for this study includes local, state and federal education policy makers; administrators and instructors in schools of education and other teaching programs, educators; and the general public.

This is the second book in the series examining student achievement. The chapters in this book reflect the scholarly papers presented at the July 2006 Education Policy, Leadership Summer Institute (EPLSI) by K–16 educators, researchers, community advocates, and policymakers who work in urban communities. The Institute serves as a place where individuals interested in scholarly discussions and research directly related to: (1) how data can be utilized to inform policy; (2) examining the urban school context from the perspectives of the polity, school leaders; students; and other related internal and external actors; and (3) identifying strategies for improving student academic achievement can gather. During this week-long Institute, participants examined the structural problems and policy tensions affecting urban communities and student achievement. The Institute's theme, Meeting the Challenges of Urban Schools is reflected throughout this book. Specifically, this edition explores the interrelated aspects of policy, practice and research and how they affect academic achievement. The five sections in this book examine different challenges facing urban schools and their impact on student performance.
