Maths Problem Solving - Year 6 is the sixth book in the Maths Problem Solving series. The books have been written for teachers to use during the numeracy lesson. They cover the 'solving problem' objectives from the numeracy framework. This book contains three chapters; Making decisions, Reasoning about numbers or shapes and Problems involving 'real life', money or measures. The books are designed in such a way that each section has six stages of questions to be worked through. Every stage is split into three levels, for example 1a, 1b or 1c, based on achievement. Each corresponding question from these levels follow the same line of questioning, so that when the teacher talks about a certain question, the solution process is the same for each level but the complexity of the sum varies.

Help your pupils smash this year's SATs Prepare pupils for the KS2 mathematical reasoning paper with this easy-to-manage test practice book. A Maths Resource for Ages 7-11 in Key Stage 2 The aim of this maths resource is to aid children and adults understanding of arithmetic questions. The strategies to be practiced and learned can be applied to differing number sentences, the formal written methods of the four operations, fraction calculations in arithmetic and reasoning and problem solving scenarios. The 4 headings used within this book are explained as follows. Understanding the Number Sentence - Put the number sentence into context, using a real life scenario or explain it, as it is written in figures and/or words as seen. Concrete Objects - Physical math resources or general resources that can be used to aid the understanding and working out of the number sentences. (Search the internet for the maths resources) Strategy to Apply - A way of working out the number sentences in written format accurately and in an efficient manner. The strategy can also be a mental calculation as well. Pictorial Representations - How the number sentences can be illustrated in a way to aid the understanding of the strategy to be applied.
